Dispensation til 4. sem. på BSc uddannelsen i Sustainable Biotechnology, 2017

Studienævnet for Kemi, Miljø- og Bioteknologi giver følgende dispensation fra studieordningen for Bacheloruddannelsen i Sustainable Biotechnology version 2016. I 2017 får 4. semester nedenstående modulsammensætning, hvor to af modulerne, Biomass Conversion samt Sustainability erstatter hhv. The Cell as a Factory samt Biochemistry II. Årsagen til dispensationen er, at studerende på den årgang, der følger 4. sem. i 2017, allerede har fulgt moduler med tilsvarende indhold på deres 2. sem.

Exemption for 4th sem. on the BSc program in Sustainable Biotechnology, 2017

The Study Board for Chemistry, Biotechnology and Environment engineering grants the following exemption from the curriculum for the BSc program in Sustainable Biotechnology version 2016. In 2017 will 4th semester obtain the below composition of modules, in which two of the modules, Biomass Conversion and Sustainability replace The Cell as a Factory and Biochemistry II. The reason for the exemption is that students in the year group following 4th semester in 2017, have already followed modules of similar contents on their 2nd semester.

4.	Microbiological Processes	5	7-point scale	Intern
	Sustainability	5	7-point scale	Intern
	Process Technology	5	7-point scale	Intern
	Biomass Conversion	15	7-point scale	Extern

Venlig hilsen

Niels T. Eriksen
Formand for Studienævnet for Kemi, Miljø og Bioteknologi
